GOALS: Students will develop an increased understanding of the principles and practices of collection management for moving images, sound, and digital assets. They will gain hands-on experience with collection assessment, including evaluating collections in such areas as collecting policies, care and handling, organization and description, item condition, storage, and access. Students will also learn strategies for collection “triage”, conservation, and preservation planning/management. They will gain experience with the preparation of assessment reports, preservation plans, and funding proposals.

EXPECTATIONS: Each student will assess the same small collection at Fales as an initial assignment. We will discuss students' findings in class as they prepare individual written assessments of the collection. During this time, they will also prepare a short paper on an aspect of appraisal and selection policies. Students will then apply their learning by conducting an individual assessment with a film/video/audio/digital repository, writing a report summarizing their findings and recommendations. They will shape all or part of the report’s short-term recommendations into a plan of immediate goals and objectives, and write a funding request that reflects the plan. The funding request will also be presented in a powerpoint presentation “pitch” at the end of the semester.

Attendance at all classes is expected unless excused, as our work together will be intensive. There will be two field trips – at the Museum of Modern Art Cecile Bartos Film Center (all day trip); and the Rogers and Hammerstein Archive of Recorded Sound at the Performing Arts Library (NYPL). Grades will be based on a combination of class preparedness and participation (20%); quality of work/presentation on the Fales Collection assessment (20%); short paper (10%); individual assessments (30%); and funding request (20%).
