GOALS: Students in this course will learn the major components of providing access in moving image, audio, and digital archives. The course is divided into two discrete parts: (1) Physical and virtual access to content and related services, and (2) Cataloging and metadata. Topics for the first part include: physical and virtual access to collections; search strategies and use of particular moving image reference resources; establishment of policies and fee structures, and how the repository/institution type influences those policies; using primary source and reference documentation; and principles of reference services. The cataloging and metadata component of the class will include instruction on standards for descriptive, technical, legal, and preservation metadata; indexing and subject analysis; wrappers; and evaluation of cataloging software.

EXPECTATIONS:

Attendance at all classes is expected unless excused, as our work together will be intensive. There will be two field trips – to the Museum of Modern Art Film Study Center; and the New York Library for the Performing Arts. Dates and times will be confirmed on the first day of class. Grades will be based on a combination of class preparedness and participation (20%); data mapping project (40%); comparison of access policies (25%); reference sources comparisons paper (15%)

TEXTS: The following texts will be used in the course, along with the articles listed below in the class descriptions. Books are on reserve at Bobst.
