

Dublin Core	PBCore	MARC	Comments
BASIC INFO			
Primary Uses	Cataloging web content.	Made for public broadcasting, mostly TV	All encompassing, but mostly used for libraries
Structure	ISO 15836 standard	Derived from Dublin Core	Binary: ISO 2709, XML; mostly SRU, or OAI-PNH
Endorsements	Many websites, some library systems	PBS	Many libraries nationwide; Library of Congress
Year of Release	1995	12005	Late 1960s
DERIVATIVE FORMATS	Several, including PBCore and many online databases	PBCore XML	MARC/XML, MARC21, UNIMARC in Europe
METADATA FIELDS			
Title, Original Language, or Alternate Title	Optional	Optional	PBCore has the most wiggle room on this, but MARC was made with it in mind.
Version	Optional	Optional	Yes
Original Release Date	Optional	Optional	Yes
Country of Origin	Optional	Optional	Yes
Sound	Optional	Optional	Optional, can be listed in other fields
Color/B&W	Optional	Optional	Yes
Publisher and/or Creator	Optional	Optional	Yes
COPYRIGHT METADATA			
Right Holder, Current	Optional	Optional	For film projection, this ought to be expanded to cover image rights, music rights, etc.
Access Restriction	No	Yes	Not surprising PBCore is the only one that has this, given how much copyrighted material is used on public television.
Other Right Holders	Yes	Optional	Yes
PHYSICAL COPIES			
Format	No	Yes	MARC goes into extensive detail on video formats especially, such as differentiating PAL and NTSC.
Condition	No	Optional	This field would be invaluable to libraries with books suffering from acid breakdown.
Generation	No	Optional	PBCore took this more seriously than MARC; MARC on the other hand can list it in its notes section.
# of Reels/Tapes/Discs	No	Optional	MARC is absolutely the best in this field; found very descriptive examples.
Storage Space	No	Optional	MARC lists the general size of the format, but not packaging (ie if something is in a box set)
Year of Creation	No	Optional	PBCore needs this badly, given that it was made with TV holdings in mind, and knowing where
Location	No	Optional	
a piece of media in your holdings should be a top priority.			
DATA COPIES			
Name of File	No	Optional	
File Size	No	Optional	
File Type	No	Optional	
Location of File	No	Optional	
Location of Back-up File	No	Optional	This field is an absolute necessity for online databases and digital projection.
