

Metadata Profile

The purpose of this application profile is to briefly show the description process that will be used for my collection of “Liked” youtube videos. Because these videos will range from being music to directed audiovisual efforts to ephemeral, accidental, or outsider products, a flexible standard like Dublin Core will be used. This is despite the fact that DC has a track record of being slightly insufficient for description of youtube information.

Entity: Title

Element Name	Video Title
Data element	dcterms: title
Definition	“Video” title, followed by url
Expected values	Unique Value, Text
Repeatability	No
Cardinality	Mandatory
Notes	Any additional information about how the value will be created, extracted or used. In cases where there is a default value (i.e. the same specified value is always used), it is included here.

Element Name	Date
Data element	Dcterms: Date
Definition	The date of the resources upload or creation, whichever is listed
Expected values	Controlled Vocabulary
Repeatability	Repeatable
Cardinality	Mandatory
Notes	Year, month, day

Element Name	Language
Data element	dcterms:language
Definition	The language used in the video, audio.
Expected values	Controlled Vocabulary
Repeatability	Yes
Cardinality	Mandatory
Notes	Controlled vocabulary

Element Name	Publisher
Data element	Dcterms: publisher
Definition	Entity responsible for making resource available
Expected values	Unique Value, Text
Repeatability	Yes
Cardinality	Mandatory
Notes	If proper name use lastname, firstname

Element Name	Dcterms: rightsHolder
Data element	Rights Holder
Definition	The entity which holds the rights to the resource
Expected values	Unique Value, Text
Repeatability	Repeatable

Cardinality	Mandatory
Notes	If proper name use lastname, firstname

Element Name	Dcterms: type
Data element	Type
Definition	Genre of resource
Expected values	Controlled Vocabulary
Repeatability	Repeatable
Cardinality	Mandatory
Notes	

Element Name	Dcterms: SizeorDuration
Data element	SizeorDuration
Definition	The durartion of the resources
Expected values	
Repeatability	Repeatable
Cardinality	Mandatory
Notes	

Element Name	Dcterms: FileType
---------------------	-------------------

Data element	File Type
Definition	The type of file the resource is encoded in
Expected values	
Repeatability	Repeatable
Cardinality	Mandatory
Notes
